Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Pending
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	Yes
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Pending

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
ai-blog-nest-api/
??? app/
?   ??? main.py
?   ??? routes/
?   ??? services/
?   ??? schemas/
?   ??? auth/
??? tests/
??? requirements.txt
??? .env.example
??? README.md
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Local development / to be deployed
Login Credentials (Demo)	[Provide demo username and password for evaluator access]
Platform / Hosting Provider	[e.g., Render, Vercel, AWS, Heroku, Azure]
Repository Link	Add project repository URL
Demo Video Link	Add demo video URL if required

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Install Python 3.x and create a virtual environment.
2. Install dependencies: pip install -r requirements.txt
3. Configure API keys/environment variables using .env.
4. Start the FastAPI server with uvicorn.
5. Open the API documentation at /docs and test the blog generation endpoint.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation		Workaround / Status
1	AI provider/API key dependency	Configure a valid key before testing	Pending
2	Generated text may need review	Add validation and human review	Open
3	Deployment URL not provided	Deploy to chosen cloud host	Pending
