Technology Stack

Date	05 October 2026
Team ID	SWTID-2026-1369
Project Name	AI Blog Nest API
Maximum Marks	

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	**Frontend / Client-Side** *(e.g., React, Angular, HTML/CSS)*	React + HTML/CSS	Responsive UI and reusable components for blog creation and editing.

2	**Backend / Server-Side** *(e.g., Node.js, Python/Django, Java)*	Node.js + Express	Fast API development and simple integration with AI services.
3	**Database / Data Storage** *(e.g., MySQL, MongoDB, PostgreSQL)*	MongoDB	Flexible storage for users, prompts, and generated blog content.
4	**Cloud / Hosting / Deployment** *(e.g., AWS, Azure, Heroku, Docker)*	AWS / Docker	Scalable deployment and containerized service management.
5	**Version Control & CI/CD**	GitHub	Version control, collaboration, and CI/CD workflow.

	(e.g., GitHub, GitLab, Jenkins) GitHub		
6	**Third-Party APIs / Other Tools** *(e.g., Stripe, Twilio, Google Maps)*	OpenAI API	AI text generation for creating and refining blog drafts.
